

WHAT THE PAID DECISION PRODUCT LOOKS LIKE

ChatGPT Ads readiness decision

SYNTHETIC DEMONSTRATION - NOT A CLIENT ENGAGEMENT. Northstar Deskworks, Northstar Desk, Arc One, all people, account observations and numbers are fictional. This sample does not prove platform access, campaign experience, performance, client demand or Shastra delivery speed.

1. Scope

FIELD	SYNTHETIC EXAMPLE
Advertiser	Northstar Deskworks Private Limited
Offer	Arc One adjustable LED desk lamp at INR 4,999
Market	India
Intended objective	Clicks; conversion use remains gated
Decision question	Build a paused pilot now, or fix readiness gaps first?

DECISION

WAIT

Do not build or activate the fictional pilot yet.

The simulated account and clicks objective are visible, the checkout path completes, demand and fulfilment are directionally useful, and one plain-product image is approved. The evidence still does not support a responsible pilot because billing, activation ownership, media ceiling, claims and rights, and measurement remain unresolved.

2. Seven-gate result

READINESS GATE	RESULT	WHY
Account, market and objective	WAIT	Billing incomplete; serving eligibility and owners unproven
Offer, demand and economics	CONDITIONAL	Demand stated; margin sign-off absent; one unsafe claim
Landing and conversion path	CONDITIONAL	Synthetic checkout passes; live consent and final-page QA absent
Claims, creative and rights	WAIT	Plain image usable; lifestyle rights unresolved
Fulfilment and support	PASS	Inventory, replenishment, dispatch and owner are stated
Budget, billing and activation	WAIT	No ceiling, billing owner or activation approver
Measurement, privacy and reporting	WAIT	Events, consent, attribution and reconciliation untested

Gate summary: 1 PASS, 2 CONDITIONAL, 4 WAIT, 0 FAIL. Hard gates determine the overall WAIT; a fit score cannot override them.

HOW THE DECISION BECOMES ACTIONABLE

The path out of WAIT

1. Priority action register

#	ACTION	EVIDENCE NEEDED	EFFECT
1	Remove the eye-strain claim	Approved claim register and final-page check	Clears unsafe-claim blocker
2	Name billing owner and activation approver	Written owner record	Required to leave WAIT
3	Approve total INR media ceiling and stop rule	Written budget decision	Required to leave WAIT
4	Resolve image rights or exclude lifestyle image	Agreement, release or signed exclusion	Required to leave WAIT
5	Run live destination, checkout and consent QA	Dated final-URL receipt	Can clear landing gate
6	Define and test a clicks-first reporting signal	Event, test receipt, owner and limitation	Can clear minimum measurement basis
7	Recheck account fields and serving eligibility	Screen-led client-owned account review	Required for account PASS

SAFE ILLUSTRATIVE DIRECTION

Three light modes for one focused desk

Arc One offers warm, neutral and cool light with three brightness levels and an adjustable position.

Do not add: eye-strain relief, productivity improvement, medical benefit, superiority, scarcity or performance promises. This is planning material only - not a submitted or approved ad.

2. What the paid sprint delivers

- One locked advertiser, offer and market
- Evidence register and missing-item log
- Seven-gate assessment
- Claims, creative and rights boundary
- Measurement and ownership prerequisites
- Ranked action register
- Written GO, CONDITIONAL, WAIT or NO-GO decision
- No activation or performance promise

INR 15,000 + applicable tax

Three business days from signed scope, cleared payment, complete intake and evidence review. No passwords, payment method, media spend, activation or results promise.
